

US 277 & US 83  
I-2 TO I-10

FACT SHEET

STATEWIDE AND RURAL CONNECTIVITY  
Key Corridors  
TPP DIVISION

DISTRICTS: LAREDO, PHARR, SAN ANGELO

REVISED: FEBRUARY 18, 2025

The Texas Department of Transportation’s (TxDOT’s) Statewide Rural Connectivity Initiative is focused on systematically upgrading rural corridors on the Texas Highway Trunk System (TTS) to four-lane divided or better highways.

The TTS provides safe, reliable, high-speed travel between economic activity centers – e.g., major cities, oil and gas production areas, deep-draft sea ports, land ports of entry, and agricultural areas - in Texas while supporting the economic health of communities along the corridors. These communities along rural connectivity corridors are defined as small and medium size cities outside urbanized areas that benefit from improved access to markets throughout the state.

The Statewide and Rural Connectivity Task Force guides and provides strategic direction on the prioritization of Key Corridors on the TTS for upgrade to four lane divided or better highways.

**US 277 and US 83 from I-2 and I-10** is one of the key corridors identified by the Statewide and Rural Connectivity Program for improvement to a four-lane divided corridor. This key corridor connects 22 border crossings on the Texas-Mexico border, addresses anticipated congestion and high growth along the border, provides an alternative to I-35 and I-10 to connect south to west and north Texas, and is part of the future I-27 system.

Safety Along Corridor

In 2023, statewide rural crashes occur 1.8 times as often on undivided highways than on divided highways. Rural undivided roadways account for 2 in 3 rural crashes and 3 in 4 rural fatalities.

Between 2019-2023

Number of Crashes	Number of Fatal Crashes
12,547	78

Support U.S./Texas truck trade with Mexico

**\$12.8 B**

Source: Bureau of Transportation Statistics Transborder Freight Data  
Includes value of truck trade processed at Brownsville, Del Rio , Eagle Pass, Hidalgo, Laredo, Presidio, Progresso, Rio Grande City and Roma ports of entry (POE) in 2023. Includes commodities - mineral fuels, oils and waxes, ores, slag and ash, dairy products, live animals, meat and edible offal, products of animal origin.

Key Corridor Characteristics

The Texas Highway Trunk System (TTS) is a network of rural highways that aims to improve rural mobility, connect major activity centers (i.e., connections to communities over 20,000 population and connections to commerce), and provide access to ports of entry into Texas. The goal is to upgrade these highways to 4-lane or better divided highways.

Summary of Corridor Progress

Total Corridor Length

**401 mi**
