

US 69 & US 175

BEAUMONT TO DALLAS

DISTRICTS: BEAUMONT, DALLAS, LUFKIN, TYLER

FACT SHEET

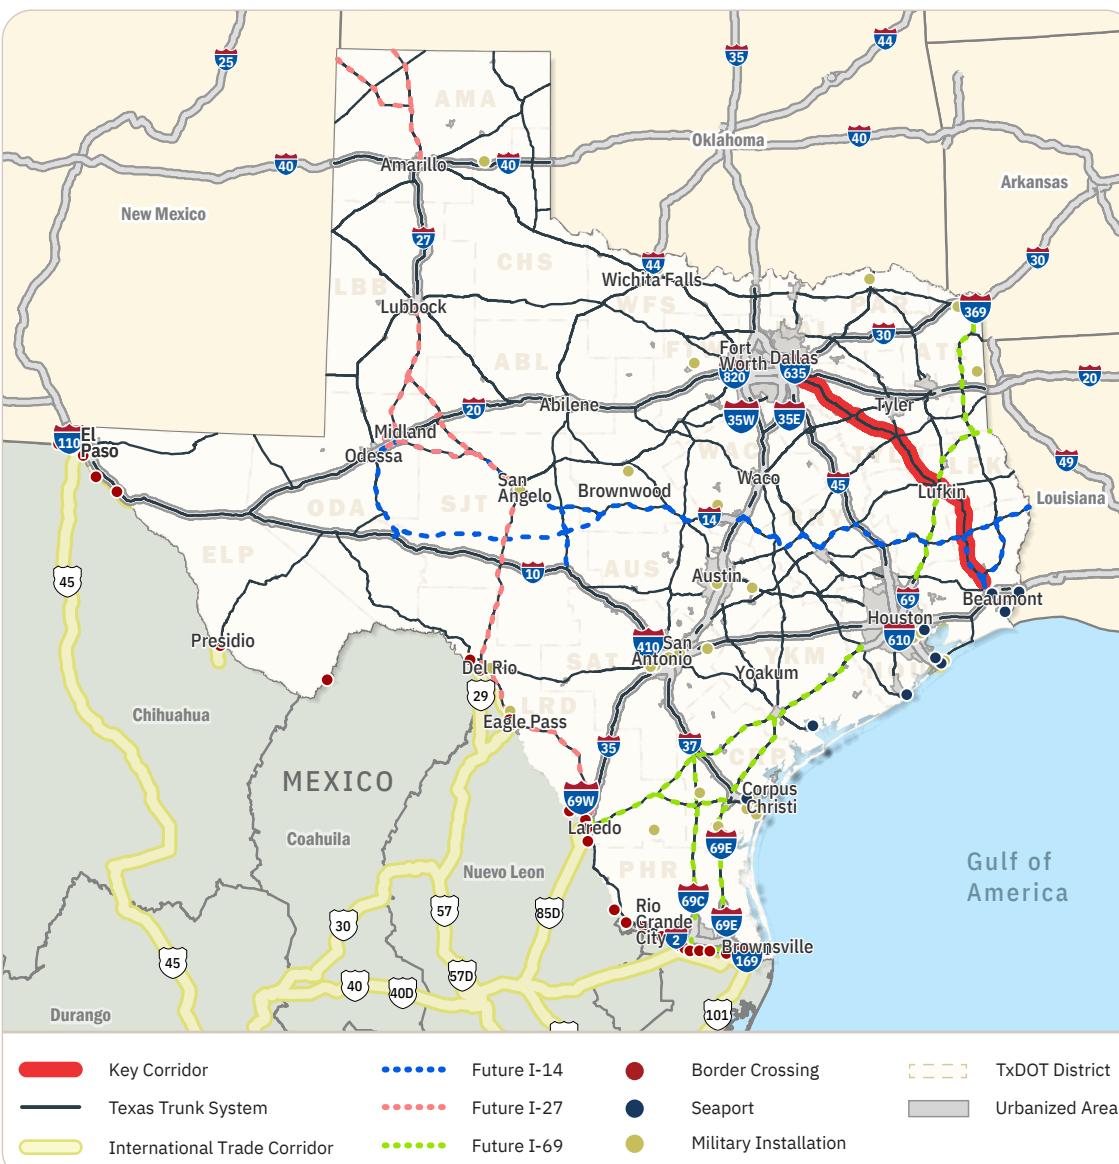

STATEWIDE AND RURAL CONNECTIVITY
Key Corridors
TPP DIVISION

REVISED: FEBRUARY 18, 2025

The Texas Department of Transportation's (TxDOT's) Statewide Rural Connectivity Initiative is focused on systematically upgrading rural corridors on the Texas Highway Trunk System (TTS) to four-lane divided or better highways.

The TTS provides safe, reliable, high-speed travel between economic activity centers – e.g., major cities, oil and gas production areas, deep-draft sea ports, land ports of entry, and agricultural areas - in Texas while supporting the economic health of communities along the corridors. These communities along rural connectivity corridors are defined as small and medium size cities outside urbanized areas that benefit from improved access to markets throughout the state.

The Statewide and Rural Connectivity Task Force guides and provides strategic direction on the prioritization of Key Corridors on the TTS for upgrade to four lane divided or better highways.

US 69 and US 175 from Beaumont to Dallas is one of the key corridors identified by the Statewide and Rural Connectivity Program for improvement to a four-lane divided corridor. This key corridor is a potential alternative to I-45, provides freight economic opportunities for communities along the corridor, serves as a Hurricane Evacuation Route, is part of the future I-14 system, and serves as a strategic connection to the Port of Beaumont.

Key Corridor Supports Texas' Economic Prosperity and Communities

Socio-economic Demographics
4.6M people 2.5M jobs

Key Corridor Characteristics

The Texas Highway Trunk System (TTS) is a network of rural highways that aims to improve rural mobility, connect major activity centers (i.e., connections to communities over 20,000 population and connections to commerce), and provide access to ports of entry into Texas. The goal is to upgrade these highways to 4-lane or better divided highways.

Summary of Corridor Progress

Total Corridor Length	To TTS Standards	Not to TTS Standards		Total
	4+ Lane Divided	2 Lanes	4 Lanes Undivided	
245 mi	152 mi (73%)	62 mi	31 mi	93 mi

Source: 2023 TxDOT Roadway Inventory Annual Data

Safety Along Corridor

In 2023, statewide rural crashes occur 1.8 times as often on undivided highways than on divided highways. Rural undivided roadways account for 2 in 3 rural crashes and 3 in 4 rural fatalities.

Between 2019-2023

Number of Crashes
5,745

Source: TxDOT Crash Records Information System (CRIS)

Number of Fatal Crashes
104

Source: TxDOT Crash Records Information System (CRIS)

Investments Needed to Address Crash Hotspots

\$1.8 B (High-level Estimates)
