

The Texas Department of Transportation's (TxDOT's) Statewide Rural Connectivity Initiative is focused on systematically upgrading rural corridors on the Texas Highway Trunk System (TTS) to four-lane divided or better highways.

The TTS provides safe, reliable, high-speed travel between economic activity centers – e.g., major cities, oil and gas production areas, deep-draft sea ports, land ports of entry, and agricultural areas - in Texas while supporting the economic health of communities along the corridors. These communities along rural connectivity corridors are defined as small and medium size cities outside urbanized areas that benefit from improved access to markets throughout the state.

The Statewide and Rural Connectivity Task Force guides and provides strategic direction on the prioritization of Key Corridors on the TTS for upgrade to four lane divided or better highways.

**US 277 and US 83 from I-2 and I-10** is one of the key corridors identified by the Statewide and Rural Connectivity Program for improvement to a four-lane divided corridor. This key corridor connects 22 border crossings on the Texas-Mexico border, addresses anticipated congestion and high growth along the border, provides an alternative to I-35 and I-10 to connect south to west and north Texas, and is part of the future I-27 system.

#### Key Corridor Supports Texas' Economic Prosperity and Communities

Socio-economic Demographics  
**1.9M people 634.8 K jobs**

Annual Average Daily Traffic  
**1K - 84K**

Annual Average Daily Truck Traffic  
**11 - 19K (~18% of all traffic)**

Support Energy Sector's Contribution to Texas GDP\*

**\$16.6 B**

Support Agriculture Sector's Contribution to Texas GDP\*

**\$0.3 B**

Support U.S./Texas truck trade with Mexico

**\$12.8 B**

Includes value of truck trade processed at Brownsville, Del Rio, Eagle Pass, Hidalgo, Laredo, Presidio, Progresso, Rio Grande City and Roma ports of entry (POE) in 2023. Includes commodities - mineral fuels, oils and waxes, ores, slag and ash, dairy products, live animals, meat and edible offal, products of animal origin.

#### Safety Along Corridor

In 2023, statewide rural crashes occur 1.8 times as often on undivided highways than on divided highways. Rural undivided roadways account for 2 in 3 rural crashes and 3 in 4 rural fatalities.

Number of Crashes  
**12,547**

Number of Fatal Crashes  
**78**

Connecting Texas 2050 Statewide Long-Range Transportation Plan

Crash hotspots are locations where crash rates are equal to or higher than 90 crashes per hundred million VMT.

#### Key Corridor Characteristics

The Texas Highway Trunk System (TTS) is a network of rural highways that aims to improve rural mobility, connect major activity centers (i.e., connections to communities over 20,000 population and connections to commerce), and provide access to ports of entry into Texas. The goal is to upgrade these highways to 4-lane or better divided highways.

#### Summary of Corridor Progress

Total Corridor Length	To TTS Standards	Not to TTS Standards		
	4+ Lane Divided	2 Lanes	4 Lanes Undivided	Total
<b>401 mi</b>	<b>117 mi (29%)</b>	<b>268 mi</b>	<b>16 mi</b>	<b>284 mi</b>
